Charting The Inland Seas: A History Of The U.S. Lake Survey

Arthur M. Woodford

applying GIS to a chronology of historic charts of the St. - PCAG Charting the inland seas: a history of the US Lake Survey United States Army Corps of Engineers - Wikipedia, the free encyclopedia. Volunteering with the U.S. Army Corps of Engineers in Detroit, Michigan, provides an opportunity to work on projects related to the Great Lakes.

The United States Army Corps of Engineers has been responsible for managing and protecting the Great Lakes for over 150 years. The Corps has played a significant role in the development and maintenance of the Great Lakes waterway system, including the construction and operation of navigation aids such as lighthouses and harbor basing systems. The Corps' responsibilities include the maintenance and operation of the Great Lakes' locks and channels, as well as the development of marine commerce and shipping. The Corps' work on the Great Lakes is a testament to the importance of these waterways to the nation's economy and infrastructure.
