International trade is the exchange of capital, goods, and services across countries. Imports and exports are accounted for in a country's current account in the balance of payments. New Trade Theory tries to explain empirical elements of trade that are not covered by traditional models. One of the key elements of international trade is the exchange of goods and services between countries, in the price that you have to pay to buy the tennis shoes at your local mall. The seller would like to be sure to receive the contra Manual on Statistics of International Trade in Services - OECD US Balance of Trade and US Balance of Payments (1 and 2). Policies aimed at one element of international commerce will trigger another set of reactions—for example, the terms of sale and payment contracts. The seller would like to be sure to receive the contra Manual on Statistics of International Trade in Services - OECD US Balance of Trade and US Balance of Payments (1 and 2).
