George Washington Carver

Matt Doeden

Garden of Praise: George Washington Carver Biography George Washington Carver was a world-famous chemist who made important agricultural discoveries and inventions. His research on peanuts, sweet potatoes, and other crops contributed to the growth of the southern economy. Carver developed hundreds of products from peanuts, sweet potatoes, and other crops, revolutionizing agriculture. His work continued to inspire scientists and inventors long after his death.

American Scientist and Botanist George Washington Carver was born in Diamond, Missouri, around 1864. He was the son of Mary and Giles Carver, an enslaved couple. Carver's early life was marked by poverty and hardship. Despite being born into slavery, Carver was determined to educate himself and improve his lot in life. He worked hard to attend school and eventually enrolled in Tuskegee Institute, where he studied botany and chemistry.

Botanist and Inventor Carver was a botanist and inventor who worked with peanuts and helped the southern farmer. His research on peanuts, sweet potatoes, and other crops contributed to the growth of the southern economy. He developed hundreds of products from peanuts, sweet potatoes, and other crops, revolutionizing agriculture. His work continued to inspire scientists and inventors long after his death.
