(Human) Resource Planning is a process that involves resource planning or allocation of resources as the human resource management process. Common project human resource management processes include resource planning, acquiring, developing, and managing a project team. A Human Resources Plan details the project roles, responsibilities, required skills, and relationships.

Human resources (HR) management includes the processes required to make the most effective use of human resources. HR processes will generally be both temporary and new. On most projects, the majority of organizational planning is done as part of the Human Resource Plan.
