The End Was To Build Well: A Half-century Of Australian Government Building Research

Geoff Bock; CSIRO (Australia)

This image contains a text that discusses the development of Australian government building research over a century. The text mentions the role of universities in supporting students' career skills and the changes to the way universities are funded for teaching and research. It highlights the significance of Central Building and the notable growth in support for students to develop their career skills. The text also references Geoff Bock's research and the government's role in building research, emphasizing the importance of partnerships and innovation in Australia's industries.

The text further elaborates on the significance of the twentieth century in Australian history, noting the challenges and developments of the time. It discusses the government's vision for the future and the role of universities in preparing students for the economic and societal changes of the next half century. The text concludes with an emphasis on the need for universities to play their part in leading Australia to a reinforced economy, supported by a series of economic reforms and good decisions made over the past century.

The text is a reflection of the century's challenges and the significance of the government building research during that period. It provides insight into the strategies and policies that were developed to address these challenges and prepare Australia for future developments.
