Virus and Virus Like Diseases Of Pome Fruits And Stone Fruits In New Zealand

G. A. Wood

This book is a comprehensive review of the virus and virus-like diseases of pome fruits and stone fruits in New Zealand. It covers the identification, distribution, and control of these diseases in detail. The book is divided into several sections, including a review of the literature, a summary of the diseases, and a discussion of the methods used for their detection and control. The book also includes a section on the economic impact of these diseases and recommendations for future research.

Key topics covered in the book include:
- Identification and classification of virus and virus-like agents
- Symptoms and diagnosis of virus and virus-like diseases
- Control measures for virus and virus-like diseases
- Economic impact of virus and virus-like diseases
- Future research needs

The book is an important resource for researchers, extension workers, and industry professionals involved in the study and management of virus and virus-like diseases of pome fruits and stone fruits in New Zealand and other regions.
