Celebrated day for positive environmental action. World Environment Day (WED) is the United Nations' principal vehicle for encouraging worldwide awareness and action for the environment. Over the years it has become the biggest and most widely celebrated global day for positive environmental action to protect nature and the environment.

World Environment Day (WED) is a day aimed at increasing local awareness and promoting positive issues. WED is the United Nations flagship environmental event. World Environment Day 2015: 21 aerial photos show humanity's connection to nature.

World Environment Day is held each year on June 5. It is one of the principal vehicles through which the United Nations (UN) stimulates worldwide awareness of environmental issues and encourages political action. Includes press releases, speeches, quotes, and stories.
